Product designer who takes products from user flows through shipped UI, then stays close to the data on how they're used. Designed and built the end-to-end experience for a 140-scene guided wellness app (Unity/iOS, live on the App Store) and the information architecture for a multi-organization business platform used to run four active companies. Comfortable owning research-adjacent decisions, interaction design, design systems, and the front-end implementation that ships them.

CORE COMPETENCIES

Product architecture & information architecture · User flows & progression systems · Freemium/paywall UX · Booking & conversion funnels · Design systems & typography systems · Prototyping to shipped UI · Cross-platform (iOS/Android/web) design · Accessibility (WCAG AA)

SELECTED WORK

Peace Life · App + Marketing Site, Unity/iOS (2021–Present)

Designed the full guided-journey UX: chakra progression stages, assessments, journaling, unlock/paywall flow, and onboarding, across 140+ scenes. Built the remote-content system that lets copy, images, and colors update post-launch without an app release. Designed and built the companion marketing site end to end.

Jarvis (Legacy Command Center) · Multi-Org Business Platform, Next.js (2025–Present)

Designed the information architecture for a single dashboard that serves four separate organizations as isolated workspaces, plus the UX for an integration-health monitor and a voice-assistant interaction model.

Once Upon a Princess · Brand + Booking Site, Astro (2026)

Designed a single-goal booking funnel (check availability) and a full visual system built around three repeating motifs (arch, invitation hairline, crown). Passed a full WCAG AA accessibility review: labeled forms, 44px touch targets, reduced-motion support.

Organización Qinty · Bilingual Program Site, Astro (2026)

Designed the user journey for a five-retreat booking/application flow and a three-tier content-governance system (verified/source/proposed) that gates any unconfirmed claim from shipping.
