

Sean Despain

Multidisciplinary Product Builder & Creative Technologist

Heber, UT · seandespain@gmail.com · (435) 695-6954

LinkedIn: [linkedin.com/in/sean-despain-560316116](https://www.linkedin.com/in/sean-despain-560316116) · Portfolio: seandespain.com

Product builder who takes ideas from concept through design, development, brand, and launch, usually alone or with a small team. Founded and operated five ventures spanning a wellness app live on the App Store, an internal business-operations platform, a 50-person construction staffing company, an international CBD company, and a bilingual retreat/conservation program in the Peruvian Amazon. Comfortable owning the full surface of a product: UX and visual design, front-end and back-end code, brand and content systems, SEO and conversion, and the operating decisions that keep a business running.

CORE COMPETENCIES

Product Product architecture · User flows & progression systems · Information architecture · Freemium/paywall design · Booking & conversion funnels · Multi-organization system design

Development Unity (C#) · Firebase (Auth, Realtime Database) · Next.js / React / TypeScript · Tailwind CSS · Astro · Node.js · HTML/CSS/JS · Git/GitHub · Netlify (deploy, Forms, Blobs) · iOS build & App Store release · Android/Gradle builds · API integrations (QuickBooks, ElevenLabs, OpenAI) · i18n/bilingual architecture

Brand & Creative Visual identity systems · Typography systems · Adobe Photoshop & Illustrator · 3D animation · Campaign asset production · Original character/IP design · Art direction

Marketing & Growth SEO · Google Analytics 4 & conversion-event tracking · JSON-LD structured data · Social/OG cards · Google Ads · Social media strategy · Lead-generation funnels · Content-verification governance

Business & Operations Team building & leadership (50+ contractors/employees) · Payroll & workforce operations · Financial strategy & investor relations · Hiring & sales training · Nonprofit program direction · Vendor/scope judgment

PROFESSIONAL & ENTREPRENEURIAL EXPERIENCE

Co-Founder, CEO, Creative & Product Lead · Peace Life

Heber, UT · Jan 2021–Present

- Designed and built the Peace Life app (Unity, iOS), a guided 7-chakra wellness journey with 140+ scenes, live on the App Store since 2026.
- Architected the app's Firebase-backed auth/data layer, a remote-content manifest system for post-launch content updates without an app release, and the freemium paywall/unlock flow.
- Built peacelifehealing.com from a blank file: full visual system, GA4 and JSON-LD instrumentation, conversion-event tracking, and the App Store launch assets.
- Directed and produced 300+ multimedia assets (graphics, video, campaigns) for marketing, education, and retreat content.
- Coordinated international collaborations, including partnerships in the Amazon rainforest.

Director of South America, Marketing & Activities · Natural Worship (Nonprofit)

International · Jan 2022–Present

- Direct the Organización Qinty program: a retreat, traditional-healing, and rainforest-conservation project near Tarapoto, Peru; serve as one of its four ceremony facilitators.
- Lead marketing/communications strategy and built the program's bilingual (English/Spanish) website with a content-verification system that blocks any unconfirmed claim from publishing.
- Organize retreats, service projects, and cultural exchange across multiple countries; build relationships with indigenous communities.
- Provide strategic guidance on scaling the nonprofit's international efforts.

Hiring Manager & Sales Trainer · Leads to Sales

2026

- Ran hiring for the sales team at a seven-figure marketing company, from screening and interviews through the final hiring decision.
- Trained and coached new hires and existing reps on the company's sales process, getting every new team member ready to sell.

Founder & President · WIP Services LLC

Orem, UT · Nov 2017 – Jan 2019

- Founded and grew a construction staffing agency to 50+ employees and contractors.
- Managed daily crew staffing, payroll, and performance across multiple luxury job sites in Park City, Deer Valley, Heber, and Midway.
- Personally trained team leads and crews on safety, quality, and efficiency.
- Declined a buyout offer from a Park City golf-course developer to keep the company independent.
- *Ongoing*: continue to build and maintain the brand's digital systems, including the public website (wipservicesllc.com) and an internal operations platform (see Selected Projects).

Founder & CEO · Nectar CBD

Provo, UT · Dec 2019 – Dec 2021

- Founded a CBD company that became the first to sell CBD into Japan.
- Directed branding, packaging, product design, and digital marketing campaigns.
- Partnered with doctors and scientists on research that contributed to Utah legislation legalizing CBD for medical purposes.
- Built international distribution partnerships and scaled operations with automation.

SELECTED PROJECTS

Peace Life · App + Marketing Site

Unity/iOS wellness app plus its marketing site. See Experience above for the full build. Live: apps.apple.com (Peace Life) · peacelifehealing.com

Jarvis (Legacy Command Center) · Internal Business Platform

Next.js 15 operations dashboard originally built for W.I.P Services, extended into a multi-organization command center serving W.I.P, Qinty, Once Upon a Princess, and Peace Life as separate workspaces. Built the CRM/payroll/calendar/reporting panels, an integration-health monitor for QuickBooks/W.I.P Portal/Netlify/ElevenLabs, and a server-side voice assistant (ElevenLabs TTS with browser-speech fallback). Added an authentication gate after identifying the dashboard had none, and fixed a production-only server/client rendering bug caused by timezone handling. No traditional database: persistence runs on a mock-store + Netlify Blobs pattern. Deployed at jarviscommandcentral.netlify.app.

W.I.P Services · Website & Digital Systems

Public marketing site and an employee/manager portal in a single repo, with a generated-page build pipeline, an image-optimization system, real-quote testimonials, two lead-generation funnels, and an operational "services completed" counter. Advised the owner to scope drywall/paint/flooring work as repair-and-remodel support rather than standalone trade services pending licensing confirmation.

Organización Qinty · Bilingual Retreat & Conservation Site

Static, bilingual (EN/ES) site built with a three-tier content-verification system (verified / source / proposed) so no conservation figure, price, or medical claim ships unconfirmed. Astro 7, hand-written design tokens, self-hosted variable fonts, multilingual sitemap, and a media-provenance pipeline that labels every image as real photography, labeled atmosphere art, or a documented placeholder.

Once Upon a Princess · Brand + Booking Site

Children's princess-party company. Designed ten original characters and a full visual system (arch motif, "invitation" hairline device, crown mark) built explicitly to avoid any resemblance to protected characters. Built a single-goal booking funnel that collects only an age band for the child, and passed a full WCAG AA accessibility review.

Leads to Sales AI Trainer (early-stage prototype)

Unity front end paired with a Node/Express + OpenAI backend for scenario-based sales roleplay with scored feedback. Early MVP-scaffold stage.

EDUCATION

Utah Valley University · Coursework in Robotics & Technology (2017–2019)

CERTIFICATIONS

- Graphic Design Certification
- Business Growth & Strategy Certification
- Content Marketing Certification (including AI-assisted marketing tools)
